Du erholst dich wieder erinnerte er mich, Alle, alle Tage **DEX-403E Prüfungsunterlagen** musst du ein neues Brötchen haben und am Sonntage zwei, und der Peter kann sie heraufbringen vom Dörfli.

### **NEW QUESTION: 1**

Which of the following is from the Internet Architecture Board (IAB) Ethics and the Internet (RFC 1087)?

- A.** There must be a way for a person to prevent information about them, which was obtained for one purpose, from being used or made available for another purpose without their consent.
- B.** Users should execute responsibilities in a manner consistent with the highest standards of their profession.
- C.** Access to and use of the Internet is a privilege and should be treated as such by all users of the systems.
- D.** There must not be personal data record-keeping systems whose very existence is secret.

### **Answer: C**

Explanation:

The IAB strongly endorses the view of the Division Advisory Panel of the National Science Foundation Division of Network, Communications Research and Infrastructure which, in paraphrase, characterized as unethical and unacceptable any activity which purposely:

- (a) seeks to gain unauthorized access to the resources of the Internet,
- (b) disrupts the intended use of the Internet,
- (c) wastes resources (people, capacity, computer) through such actions,
- (d) destroys the integrity of computer-based information, and/or
- (e) compromises the privacy of users.

The Internet exists in the general research milieu. Portions of it continue to be used to support research and experimentation on networking. Because experimentation on the Internet has the potential to affect all of its components and users, researchers have the responsibility to exercise

great caution in the conduct of their work.

Negligence in the conduct of Internet-wide experiments is both irresponsible and unacceptable.

The IAB plans to take whatever actions it can, in concert with Federal agencies and other interested parties, to identify and to set up technical and procedural mechanisms to make the Internet more resistant to disruption.

In the final analysis, the health and well-being of the Internet is the responsibility of its users who

must, uniformly, guard against abuses which disrupt the system and threaten its long-term viability.

NOTE FROM CLEMENT:

For the purpose of the exam, ensure you are very familiar with the ISC2 code of ethics. There will

be a few questions on the exam related to it and you must also sign and agree to the code in order

to take the exam. The code of ethics consist of 4 high level cannons. Do ensure you know the order of the 4 cannons, the first one listed it the most important.

See an extract of the code below:

Code

All information systems security professionals who are certified by (Isc)2 recognize that such certification is a privilege that must be both earned and maintained. In support of this principle, all

(Isc)2 members are required to commit to fully support this Code of Ethics (the "Code"). (Isc)2 members who intentionally or knowingly violate any provision of the Code will be subject to action

by a peer review panel, which may result in the revocation of certification. (Isc)2 members are obligated to follow the ethics complaint procedure upon observing any action by an (ISC)2 member that breach the Code. Failure to do so may be considered a breach of the Code pursuant

to Canon IV.

There are only four mandatory canons in the Code. By necessity, such high-level guidance is not intended to be a substitute for the ethical judgment of the professional.

Code of Ethics Preamble:

The safety and welfare of society and the common good, duty to our principals, and to each other,

requires that we adhere, and be seen to adhere, to the highest ethical standards of behavior. Therefore, strict adherence to this Code is a condition of certification.

Code of Ethics Canons:

Protect society, the common good, necessary public trust and confidence, and the infrastructure.

Act honorably, honestly, justly, responsibly, and legally.

Provide diligent and competent service to principals.

Advance and protect the profession.

The following are incorrect answers:

-Users should execute responsibilities in a manner consistent with the highest standards of their profession is incorrect because it is from the (ISC)2 code of ethics.

-

There must not be personal data record-keeping systems whose very existence is secret is incorrect because if is from the U.S. Department of Health, Education, and Welfare Code of Fair Information Practices.

-

There must be a way for a person to prevent information about them, which was obtained for one purpose, from being used or made available for another purpose without their consent is incorrect because if is from the U.S. Department of Health, Education, and Welfare Code of Fair Information Practices.

### NEW QUESTION: 2

View the exhibit and examine the structure of ORDERS and CUSTOMERS tables.

Which INSERT statement should be used to add a row into the ORDERS table for the customer whose CUST\_LAST\_NAME is Roberts and CREDIT\_LIMIT is 600? Assume there exists only one row with CUST\_LAST\_NAME as Roberts and CREDIT\_LIMIT as 600.

- A. INSERT INTO orders VALUES (1,'10-mar-2007', 'direct', (SELECT customer\_id FROM customers WHERE cust\_last\_name='Roberts' AND credit\_limit=600), 1000);
- B. INSERT INTO (SELECT o.order\_id, o.order\_date, o.order\_mode, c.customer\_id, o.order\_total FROM orders o, customers c WHERE o.customer\_id = c.customer\_id AND c.cust\_last\_name='Roberts' AND c.credit\_limit=600) VALUES (1,'10-mar-2007', 'direct', (SELECT customer\_id FROM customers WHERE cust\_last\_name='Roberts' AND credit\_limit=600), 1000);
- C. INSERT INTO orders (order\_id, order\_date, order\_mode, (SELECT customer\_id FROM customers WHERE cust\_last\_name='Roberts' AND credit\_limit=600), order\_total) VALUES (1,'10-mar-2007', 'direct', &customer\_id, 1000);
- D. INSERT INTO orders (order\_id, order\_date, order\_mode, (SELECT customer\_id FROM customers WHERE cust\_last\_name='Roberts' AND credit\_limit=600), order\_total) VALUES (1,'10-mar-2007', 'direct', &&customer\_id, 1000);

**Answer: A**

### NEW QUESTION: 3

A project team has a dedicated scoping phase for their project where all subject matter experts are meeting together with a trained facilitator. They have interviewed each person in the room to gather ideas for functionality and are now voting on them to put them in order, ranking the most useful ideas so they can be taken up for further brainstorming. The group's activities are an example of:

- A. The nominal group technique.
- B. Focus group
- C. Brainstorming
- D. The Majority technique

**Answer: A**

### NEW QUESTION: 4

You are managing a site collection in a SharePoint farm.

You need to configure the minimum level of permissions necessary for users to manage lists in the site collection.

What permission level should you configure?

- A. Contribute
- B. Design
- C. Create
- D. Full Control

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

To manage lists, you need the Manage Lists permission. The Managed Lists permission is included in the following permission levels:

Edit

Design

Full Control

Manage Hierarchy

In this question, the minimum permission level that includes the Manage Lists permission is Design.
