

Maintenance of Clean and Green Environment of the College

The aim of the practice is to create awareness about various environmental issues and their impacts.

The purpose is to free the campus from pollution and plastic waste and maintain a clean and green campus.

To maintain the clean and green environment of the college, the department of Physics along with NSS team of the college, arrange the following:

- Environmental awareness classes for the students by the faculty of the Department of Physics.
- Involvement of students and teachers in tree plantation.
- The college has a rainwater harvesting tank (Planning), a vermi-compost pit (planning), and separate dustbins for different waste.

Clean and Green campus initiatives are challenging, as they require determination and long-term commitment from all the stakeholders.
